EDUCATION

Study Program Bennett University

08/2022 - Present

New Delhi, India , CGPA -8.32

Btech Cse

- Salon management system, news website, taskmaster

PERSONAL PROJECTS

TIC TAC TOE (07/2023 - 07/2023)

- I make an TIC TAC TOE game using HTML,CSS and javascript only. I also add responsiveness to this game so that users can play this in any device either it will be a PC , desktop or Mobile.

Salon management system (08/2023 - Present)

- Created a Console Application using c++ & data structures. Traditional paper-based methods of managing salon operations are prone to errors and inefficiencies. There is a system that helps users to streamlines these processes and enhances the overall efficiency of the salon called as Salon Management System.

Current News (10/2023 - Present)

- an api based NEWS website- "CURRENT TIMES". In this project I fatches my news headlines through " [newsAPI.org](https://newsapi.org/) " using javascript . There is a search button in this website so that when we type any keyword for ex- virat kohli then it shows the current news based on this topic only. We can do around 100 searches or requests at a day and if you click at any news headlines it jumps on to that website from where the news was fatched.

TaskMaster (09/2023 - Present)

- created a (TaskMaster) to-do list app using REACTJS - it is designed to help users to manage day to day tasks and activities. I use JSON server to store data in local storage as we dont provide any login stuff . It helps user to store there data even you refresh the page or close the tab , the tasks and themes remain in the local storage.
